

Innovative technology for a better life

Massage units for beds

Massage units VMU-Series

A refreshing vibration massage that gives you strength and vitality for the whole day!

General description

Our massage units of the VMU series comprises a high-quality cabled handset, a plug-in power supply and specially shaped 12VDC massage motors, which are built directly into the mattress.

The vibration massage, that can be felt all over the mattress, has a relaxing and refreshing effect. Optionally, the VMU massage device can be equipped with a bi-directional RF remote control.

Control via VIBRADORM App is also possible. For beds with motorized adjustment, the VMU can also be supplied with a multifunction cabled handset / transmitter, which can be used to set the massage functions and to adjust the bed.

Features

- specially shaped 12VDC massage motors for direct installation into the mattress
- high quality CDM-F cabled handset with LED status indication
- individually adjustable massage intensity for each zone
- wave massage function
- pulse massage function
- timer function
- quality „Made In Germany“

Options

cabled CDM-F handset optional with

- special varnishing
- logo-printing on handset

massage system optional with

- premium-class handset PRESTIGE II (NEW)
- RF remote control PRESTIGE II (NEW)
- RF remote control with LCD and wake up function
- five, seven or ten massage motors (5 sections)
- high-power massage motors to create an even more intensive massage experience

Massage units VRM series

A gentle vibration massage for a deep and wholesome sleep!

for manual adjustable slatted frames

for slatted frames with motorized adjustment

General description

Our new VRM massage unit consists of a high-quality RF remote control, a plug-in power supply, a small control unit and two very quiet 12 VDC massage motors, which are attached to the bottom side of a slatted frame or a box spring bed.

Gentle vibrations that can be felt all over the mattress have a relaxing effect and ensure a deep and restful sleep.

The VRM-5 model was specially designed for manually adjustable slatted frames and box spring beds.

Thanks to its multifunctional remote control, the VRM-6 is perfect for slatted frames and beds with motorized adjustment.

Features

- two quiet and maintenance-free 12 VDC massage motors
- easy to fix on almost any slatted frame or box spring bed
- premium class RF remote control
- individually adjustable massage intensity
- wave massage function
- pulse massage function
- timer function
- quality „Made In Germany“

Options

RF remote control

- torch function
- background illumination
- logo-printing on handset
- special varnishing

massage-system optional with

- LED-Nachtlicht
- third massage motor
- RF remote control with LCD and wake up function
