

# Massage units VMU-Series

A refreshing vibration massage that gives you strength and vitality for the whole day!

## General description

Our massage units of the VMU series comprises a high-quality cabled handset, a plug-in power supply and specially shaped 12VDC massage motors, which are built directly into the mattress.

The vibration massage, that can be felt all over the mattress, has a relaxing and refreshing effect. Optionally, the VMU massage device can be equipped with a bi-directional RF remote control.

Control via VIBRADORM App is also possible. For beds with motorized adjustment, the VMU can also be supplied with a multifunction cabled handset / transmitter, which can be used to set the massage functions and to adjust the bed.
